CREATING CHEMISTRY OF THE FUTURE IN DEFENCE

40th Anniversary of PIK-AS Austria GmbH

Christina and Franz Polster

This year, PIK-AS Austria GmbH with its headquarter in Mariasdorf (Austria), is celebrating its 40th year in business. Founded in the

early 80's through Franz Polster, an expert in business development and recognizer of technical trends, the company grew steadily in the sales and production of electromechanical components, such as high-power relays, LED interior lighting, power connectors and harnessing for special purpose vehicles. The company is still a private company and managed in 2nd generation through Christina Polster.

Beginning of this year, PIK-AS expanded the production capacities and opened the new production facility in Unterschuetzen (Austria). PIK-AS is a strong and reliable partner since 4 decades and

supplier to many high-quality manufacturers of land vehicles and their systems worldwide. Customers trust on the high service level from the international team as well as on the high-quality products supplied from PIK-AS Austria GmbH.

PIK-AS LED map reading light PA2310R is positioned as standard for land vehicles

PIK-AS Austria GmbH announces that the LED map reading light PA2310R is positioned as standard for land vehicles and military workspaces.

With several thousand sold units for different international land vehicle programs, the map reading light of PIK-AS Austria proved that armies trust on the provided functionalities, such as: white light, blackout/color light, automatic change to blackout light, backup battery, stepless dimming, low voltage alert, EMC MIL-STD-461 approval, shock/vibration approval, combat approved.

The LED map reading light became the new standard for land vehicles and impressed through brilliant light output, user friendly operation, robust design, high reliability and best performance on the market.

Besides the map reading light, PIK-AS offers also several series of dome lights with the same range of options and customized versions to suit the best way to existing or new designs of land vehicles, military shelters or containers.

The units will be presented on the PIK-AS Austria booth at Eurosatory in Paris, hall 5, stand 5H341.
