

PCB Mount shown, PC Board not included

### **FEATURES**

- > PCB mountable option allows lowest cost OEM solution by eliminating need for cables, wires and connector.
- Hermetically Sealed Designed to meet: UL1604 for Class I & II, Div 2 and Class III for use in hazardous locations, IP67 for temporary water immersion for 30 min, SAE J1171 external ignition protection, and ISO8846 for protection against ignition around flammable gasses.
- > Meets CE Conformance standards.

GIGAVAC®

powered by

**PIK-AS** 

> Not position sensitive – can be mounted in any position for ease of installation.

## ADVANCED SWITCHING SOLUTIONS

### GVL140 Series

### **PRODUCT SPECIFICATIONS**

Specifications	Units	Data	
Rated Voltage	V	100	
Contact Arrangement			
Main	Form	Bi-Stable	
Auxiliary <sup>1</sup>	Form A or B	SPST-NO or SPST-NC	
Mechanical Life	cycles	1,000,000	
Contact Resistance <sup>2</sup>			
Max	mohms	0.4	
Typical	mohms	0.3	
Set (Close) Time <sup>3</sup>			
Max	ms	20	
Typical	ms	13	
Reset (Open) Time, Max	ms	12	
Insulation Resistance <sup>4</sup>	Mohms	100	
Dielectric at sea level (leakage < 1mA)	VRMS	2,500	
Shock, 1/2 Sine, 11ms			
Actuated (closed)	G	30	
Non Actuated (open)	G 18		
Vibration, Sinusoidal (10-2000 Hz peak)	G	20	
Environmental Seal	Exceeds IP67 & IP69K		
Salt Fog	MIL-STD-810		

### POWER SWITCHING AND CURRENT CARRY RATINGS

## 

### DC POWER SWITCHING CYCLES<sup>8</sup>

COIL RATINGS at 25°C

Coil P/N Designation	В	C
Coil Voltage, Nominal	12 VDC	24 VDC
Coil Voltage, Max <sup>7</sup>	16 V	32 V
Set and Reset Voltage, Max <sup>6,7</sup>	7.5 V	15 V
Set and Reset Current, Max <sup>6,7</sup>	2 A	1 A

#### **Temperature and Weight**

Operating ambient Temp Range =  $-55 \text{ to } +85^{\circ}\text{C}^{5}$ Storage ambient Temp Range =  $-70 \text{ to } +150^{\circ}\text{C}$ Weight, typical: Upright Mount = 0.45 kg (0.99 lb) PCB Mount = 0.39 kg (0.86 lb)

#### Packaging

### PART NUMBER SYSTEM

GVL	L	14 <u>4</u>	В	Р	В
Drive	<b>H</b> = High Side				
	L = Low Side				
Mounting		$\underline{1} = Upright$			
		<u><b>4</b></u> = PCB, M8			
Coil Voltage			<b>B</b> = 12 Vdc		
			<b>C</b> = 24 Vdc		
Coil Termination				<b>A</b> = Flying leads 38 cm (15 in)	
				<b>P</b> = Pins (PCB)	
Auxiliary Contacts					X = None
					<b>B</b> = SPST-NO Normally Open
					<b>C</b> = SPST-NC Normally Closed

### **APPLICATION NOTES**

• Power switching lifecycles are based on <u>current flow</u> from A1(+) to A2(-). For best breaking performance, the contactor should be installed so that current flows from A1(+) to A2(-). There are cases where the contactor will interrupt power in the opposite direction but please contact GIGAVAC to confirm suitability. Direction of current flow is not relevant during make or when flowing on closed contacts. For bi-directional contactors, please contact GIGAVAC.

• Applications with capacitors will require a pre-charge circuit.

• Electrical life rating is based on resistive load with 27µH maximum inductance in circuit. Because your application may be different, we suggest you test the contactor in your circuit to verify life is as required.

• End of life is defined as when the dielectric, insulation resistance or contact resistance exceeds the specifications listed.

#### **Notes & Definitions:**

**1** Auxiliary contact rating is 2A, 24Vdc Resistive load, 100,000 cycles. Minimum current is 0.1mA, 5V. The auxiliary contact is mechanically linked to the main power contacts.

2 Contact resisitance measured at currents higher than 100A.

**3** Operation time is measured at 25°C and includes maximum 7ms bounce.

4 Insulation resistance is 50 Mohms after life.

**5** Contactor can operate up to 125°C in special cases - contact GIGAVAC for details.

**6** Set voltage is voltage required to ensure contacts close. Minimum pulse of 100ms required.

**7** Contactor is operated by a coil that changes resistance with temperature. Since coil voltage, set and reset voltage, and set and reset current are specified at nominal voltage, they will be lower than indicated at temperatures above 25°C and higher than indicated at temperatures below 25°C.

**8** Limit make current to 600A to avoid contact welding. For AC power switching cycles, contact factory.
